Milliken Contract

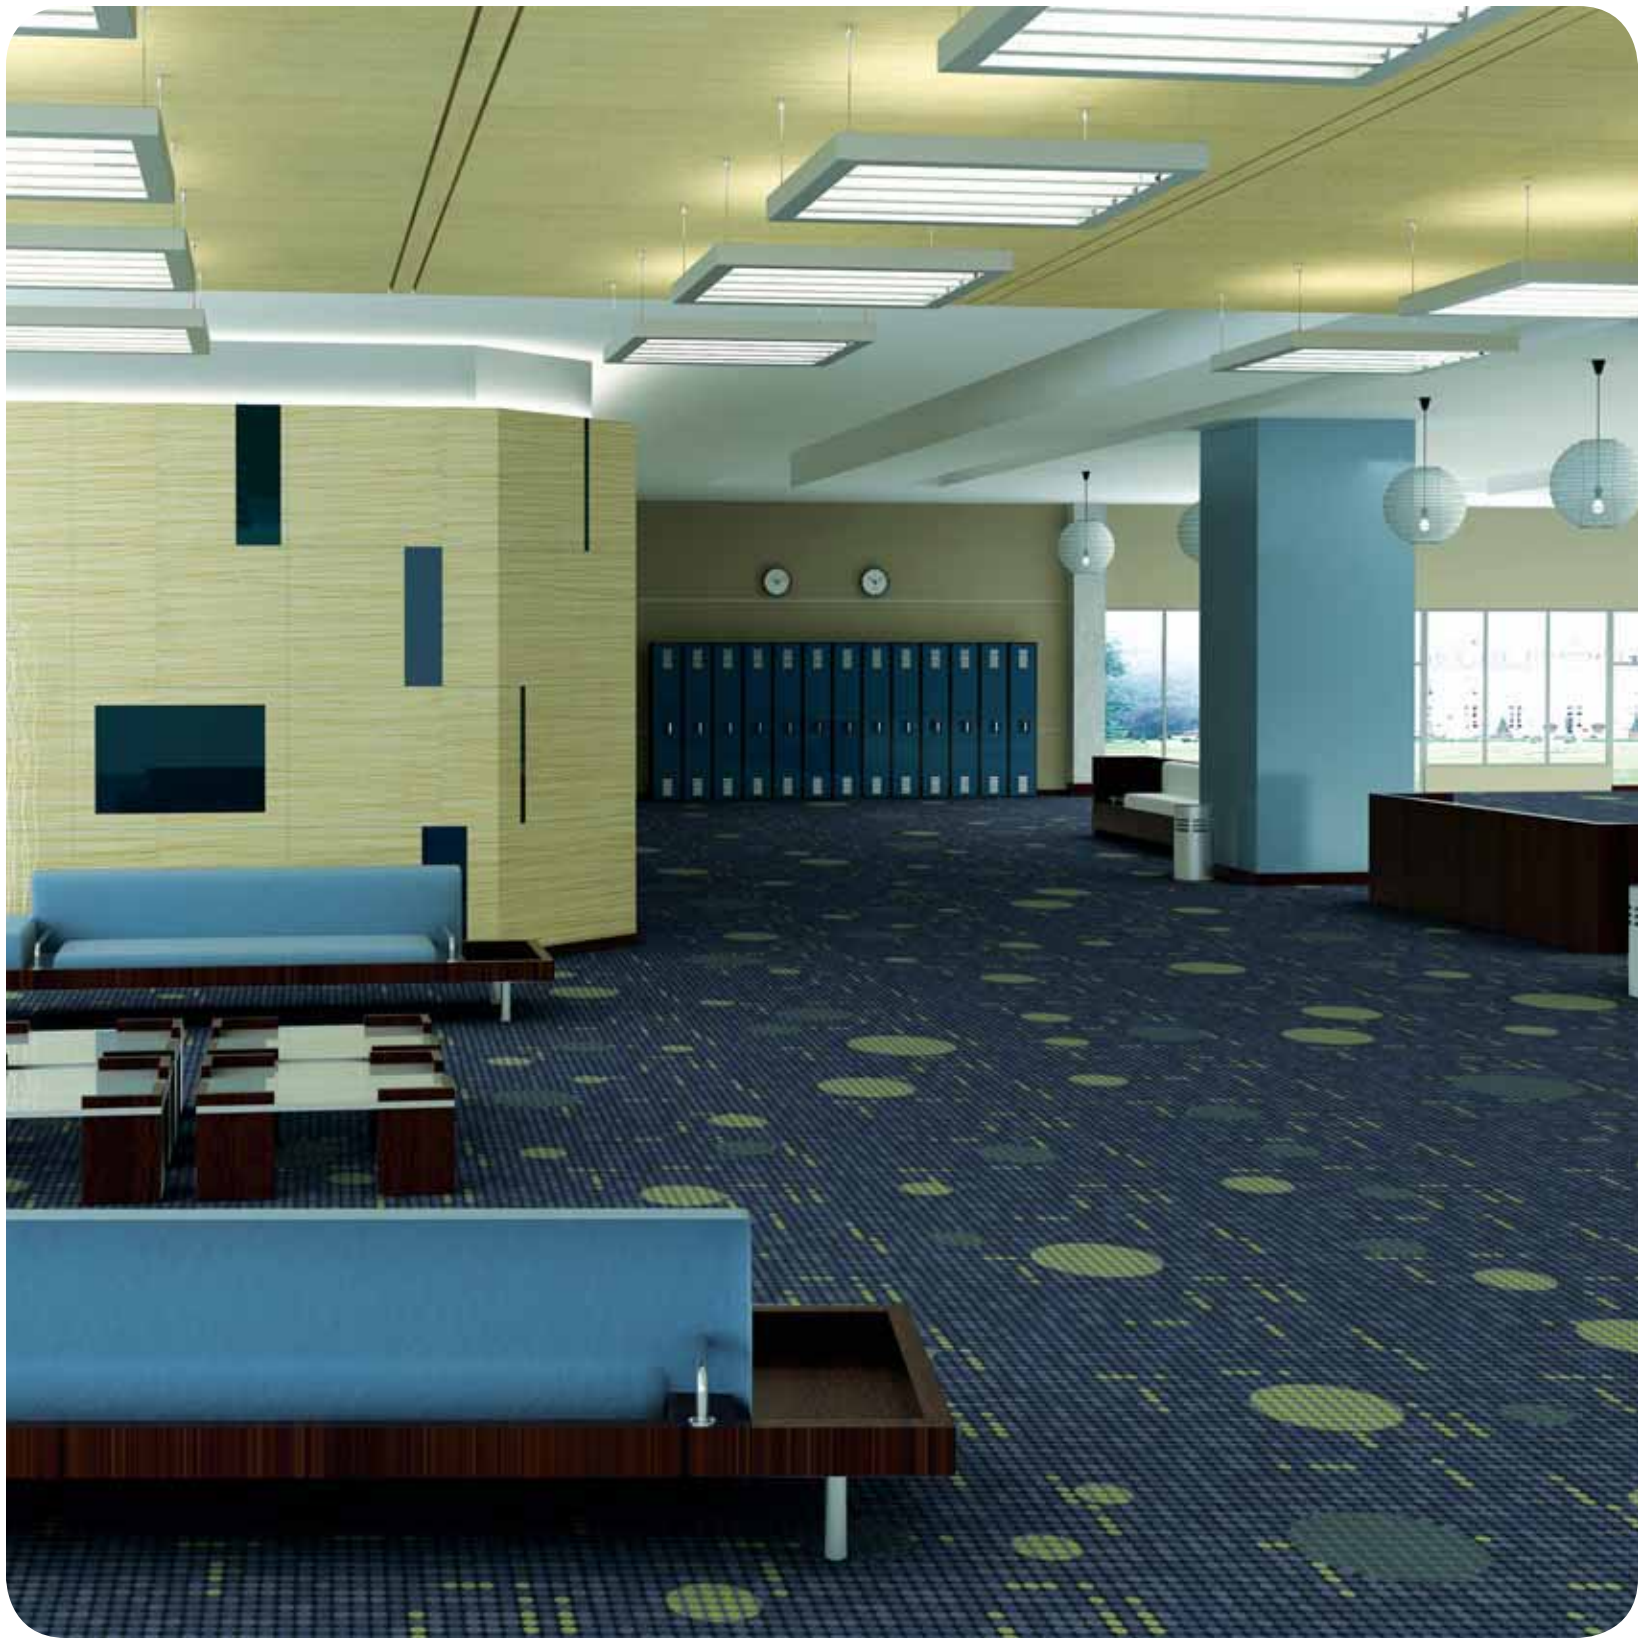

Milliken brings true randomization to education

Introducing Stimulus™* from Milliken, an entirely new way to achieve random patterns with the look of custom design. No special installation technique is required to work with our cushion-backed modular carpet. It's never been so easy — or affordable — to be totally mixed up right out of the box.

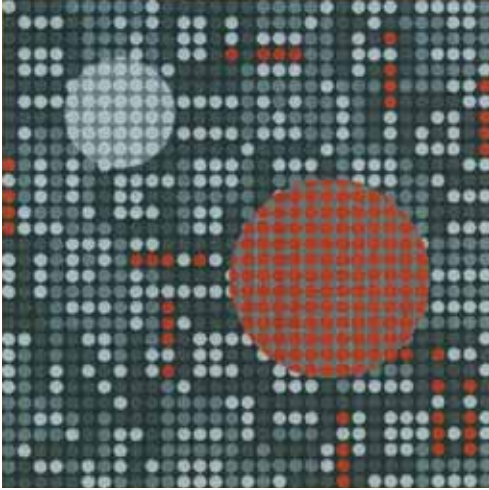

With Stimulus, randomization happens as a carefully planned part of the design

process. Milliken's process means that for the first time, you can create exciting floorscapes of seemingly infinite variety without that all-too-common patchwork look.

What better way to celebrate your corridors, your libraries and all your open spaces than with Milliken's brilliantly mixed-up designs.

stimulus™

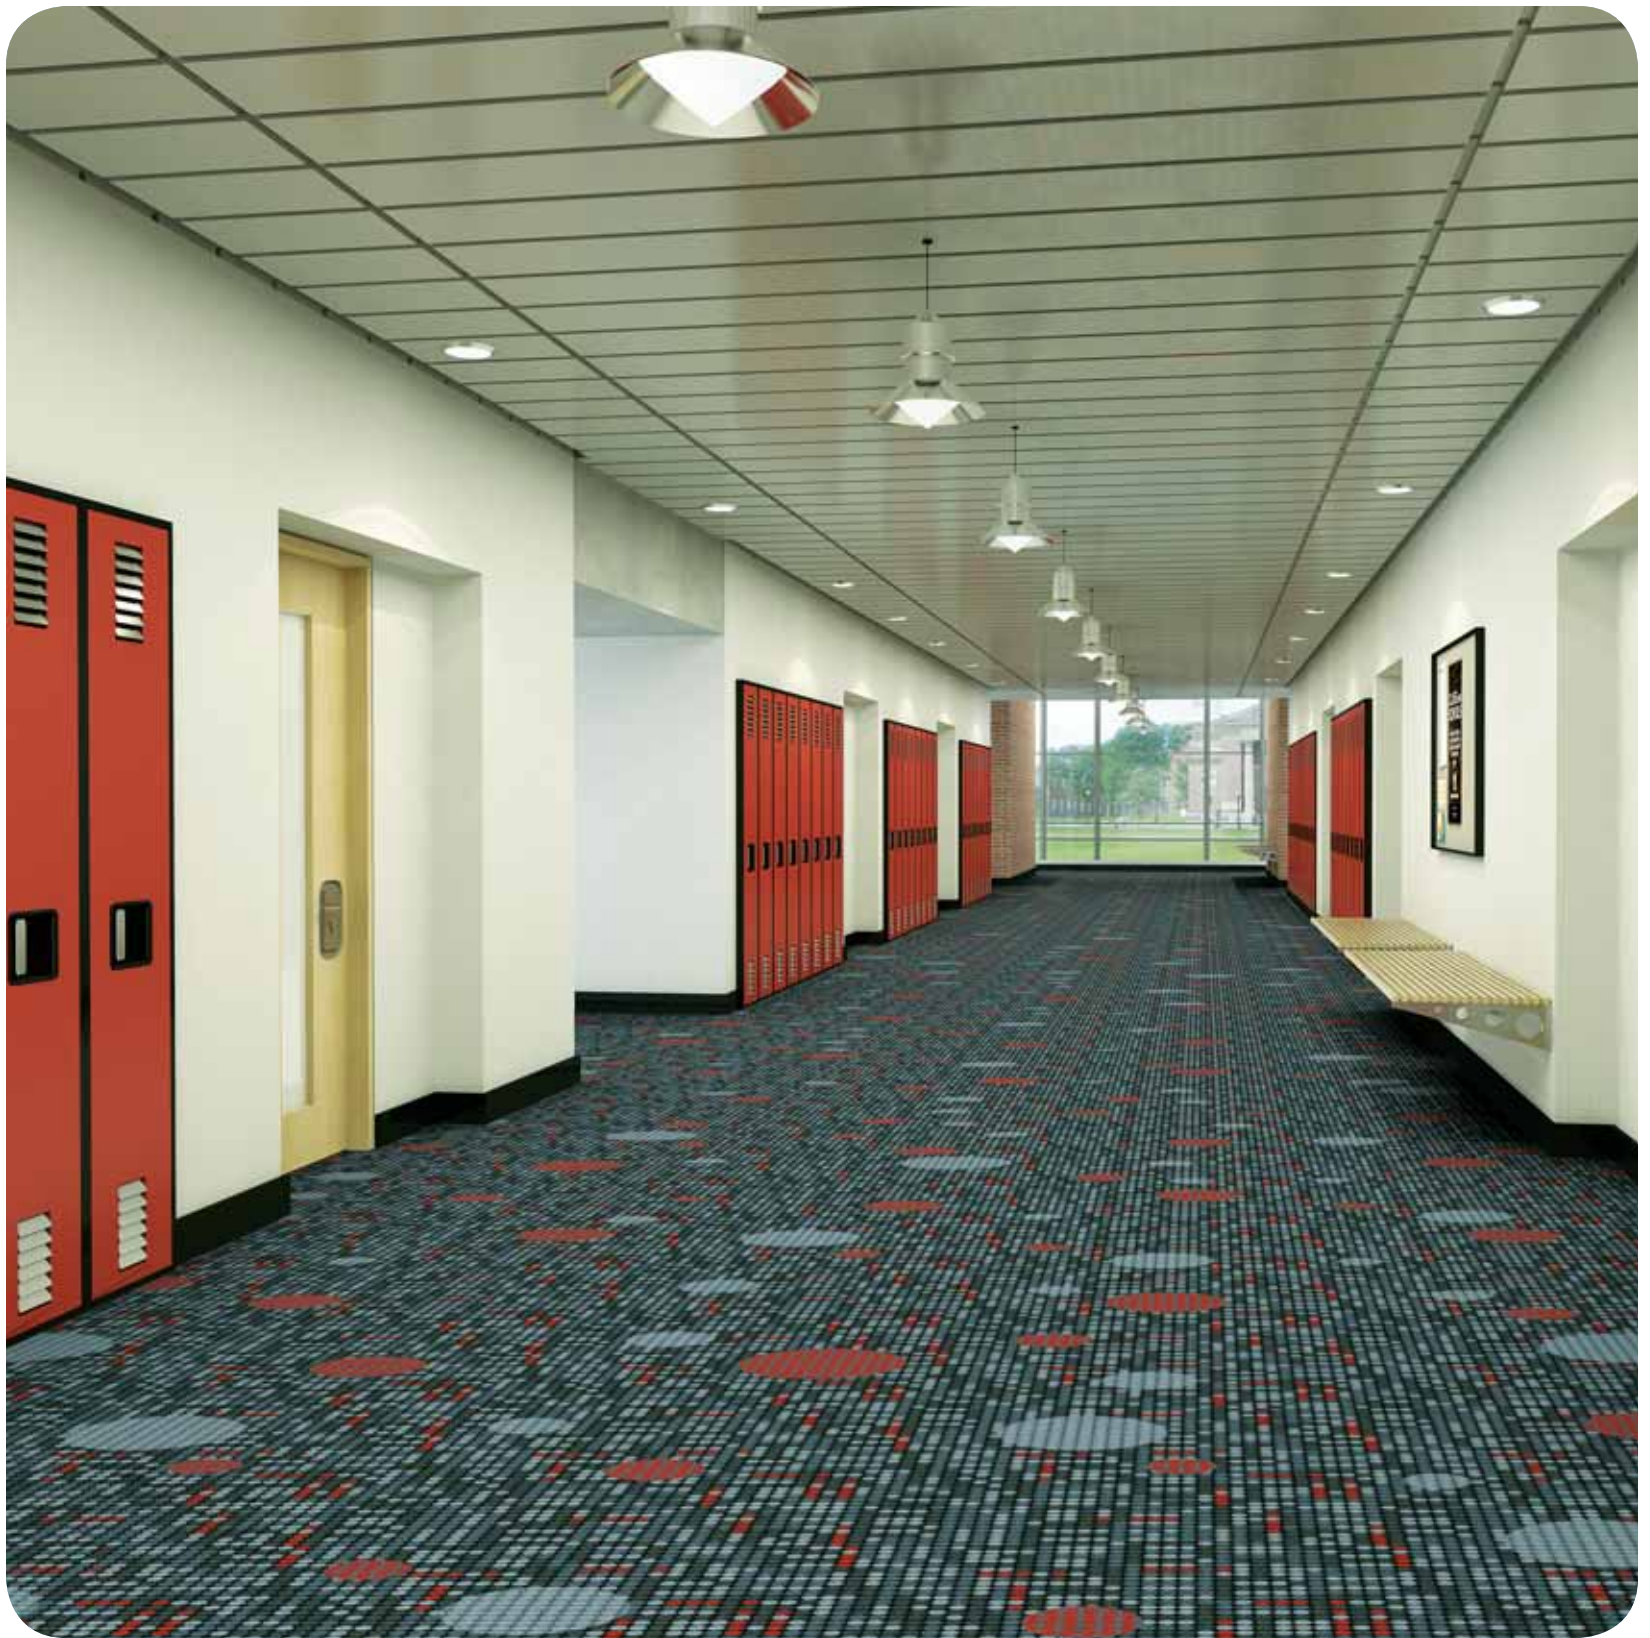

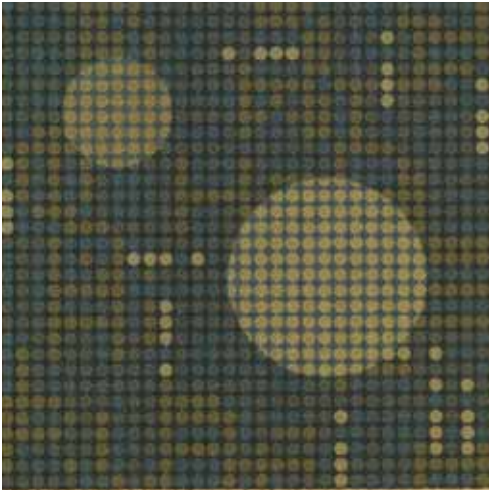

Blip

FEATURING **stimulus**

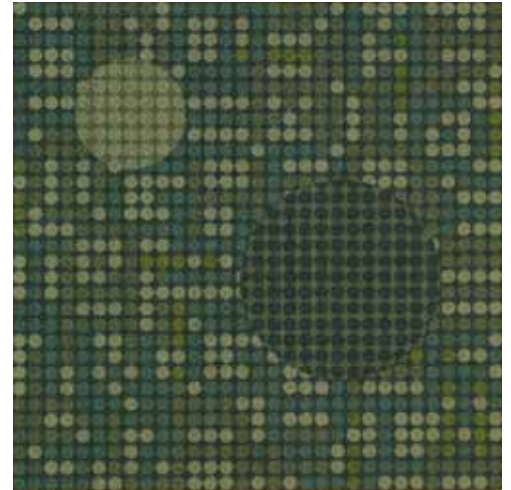

Feel the energy. Our popular Blip pattern gets extra juice with a random inclusion of bigger blips. Pattern repeats become all but impossible to locate.

Coordinates with the designs from the award-winning Theory Collection.

Excel

FEATURING **stimulus**

Add a lift to any space. Through the Stimulus process, we've added extra shots of color to our Excel pattern, making it easy to boredom-proof classrooms and administrative areas alike.

Draft

FEATURING 

Experience science as art. Our Draft pattern gets spectacular linear markings that bring to mind chromosome mapping, a kind of unique graphic fingerprint that makes for a floorscape like no other. Added injections of color keep the discovery process alive.

Backbeat

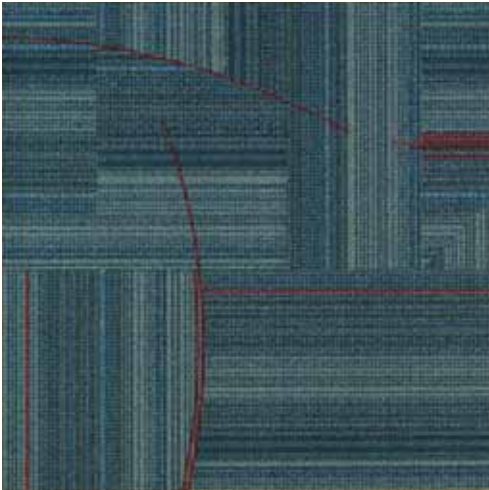

FEATURING **stimulus**

Geometry may teach that the shortest distance between two points is a straight line. But one look at the bright color arcs and kinetic energy of Backbeat and it's clear there's more to education than straight lines.

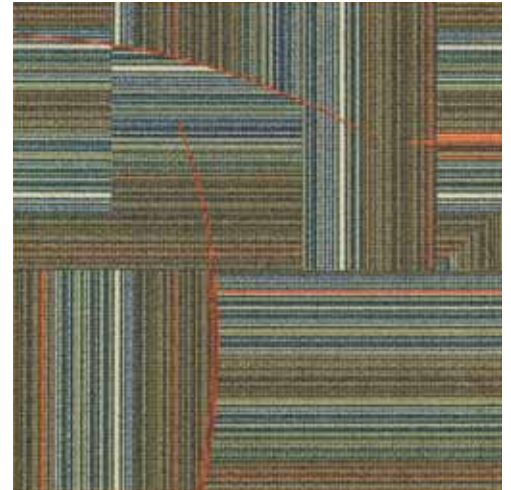

The unique Stimulus process enlivens any space with unpredictable curves — the perfect foil for developing minds.

Coordinates with the designs in the Remix Collection.
